How satisfied are young people in Greece with their lives today? How do they see their economic future? How do they rate their country's democratic institutions, including political parties? And what do they fear most? The answers to these and many other questions are provided by the FES Athens Youth Study Greece 2024, which is being published for the first time. During the event, our experts will present the main findings of the Youth Study. We will then discuss the implications of the results and possible policy recommendations arising from the study.
